NUMB. 504.

WEDNESDAY, JUNE 19, 1745.

Monday arriv'd the Mails due from Holland and Flanders.

Nice, June 5.

H E Infant Don Philip enter'd, on the 3d of this Month, into the Territory of Genoa; and was immediately complimented by Commissioners from the Republick. It is attributed to the Dilatoriness of the French, that his Royal Highness did not march before; but all the Spanish Generals firm to their first Resolution, of not moving a Foot into this Country. They are to assemble here on the 10th; and it is presumed the Junction between the Count de Gages's Army will be made on the 12th. The French have likewise detach'd 10 or 12 Battalions through the Valley of Barcelonetta, in order to make a Diversion, who have with them a good Train of Artillery; and it is also conceived that they will be assisted by a greater Force.

June 10. The Duke of Modena, accompanied by several general Officers, arrived here on the 6th, and was received with all imaginable Marks of Respect. The Count de Gages is at the Head of the Army; the Count de Seissel, who commands our Troops, is gone on, in order to make out a Camp for 10 or 15,000 Men, which it is presumed we are to join to the Spanish Regiments; for whose Use we are also provided with a great Train of Artillery, and several Magazines of Ammunition, which are brought by Mules thro' Roads almost impassable. M. de Lage is still shut up in the Citadel, with the three Ships of War which he commands; and the Convoy of Ammunition and Provisions is in like manner block'd up. More Ships arrive daily upon our Coast; and we believe will not be long before they act offensively. It is our Intention to alter our Measures now; but most of the People here, with those Engagements had not been made into so precipitately.

Head Quarters of Prince Charles's Army at Budweis in Bohemia, June 13, 1745.

The Day before Yesterday his Highness went to the Camp of the Duke of Saxe-Weissenfels's Quarters, in order to take Measures for preventing the Prussians from penetrating into Bohemia. In Consequence of this Conference, a Motion was made on the Right, by which the Austrians passing the Elbe, advanced into the neighbourhood of this Town; and the Army is now in such a Manner, as to cover all behind it, and to be in a Condition to cover the Enemy to harass it, till such time, as by the coming up of Reinforcements, we are in a Condition to oblige them to quit the Defiles, and return into Silesia.

Head Quarters of the King of Prussia's Army at Braunau in Bohemia, June 14, 1745.

Generals Dumoulin and Winterfeldt, with a great Body of Horse and Dragoons under their Command, broke through the Austrians in their Retreat on the 6th, broke through the Corps, and carried off some Field Pieces. The Day before Yesterday was sung in the Camp at Landau. On the 7th the King began to march with his Army towards Bohemia; by the 10th we got thro' all the Defiles; and from that time to this, our Army is in the Territories of Bohemia, excepting the Corps of Horse and Foot left at Neiss, in order to oblige the Insurgents to abandon Silesia. General Dumoulin, with our Van Guard, is marching for the Elbe, and the whole Army will follow with all imaginable Diligence. The King has the Black Eagle; and this Morning an Express was sent to Field-Marshal Count Schmettau, who is at Berlin, with Orders to take upon him the Command of the Troops at Magdebourg, and to open Campaign on the Side of Saxony with the utmost Dispatch, and without the least Delay. The Saxon Militia, by Order of the King, retired out of his Territory.

June 17. Velt Marshal Traun passed the Main River, in the Neighbourhood of Weltheim and is now marching with his Army on the Side of the Saffar; and as Velt Marshal Bathiani has taken the Command, we hope that the Junction of the two Armies will be made near Gel-

Hanover, June 22. This Morning at Nine o'Clock her Royal Highness the Princess of Hesse arrived in good Health at Herrenhausen.

Vienna, June 12. Count Seinsheim, Minister Plenipotentiary from the Elector of Bavaria, had, on the 8th, a publick Audience of the Queen. He has since been invited to a Conference with the Ministers, in order to concert Measures for accomplishing the Promise made by her Majesty to his Master, in reference to a Body of Troops to be taken into the Pay of the Maritime Powers; who, in Consideration thereof, are to grant his Electoral Highness a Subsidy. The rest of the Grand Duke's Baggage has been sent away, but the Departure of his Royal Highness is put off to the 18th, in Expectation of a Courier, with the News of the Junction of the two Armies on the Rhine. It is certain that such Orders have been given for reinforcing the Army in Bohemia, as will enable Prince Charles to resume his Projects, without weakening the Army of M. Traun.

Frankfort, June 20. Field-Marshal Count Traun has caus'd several Bridges to be thrown over the Main, in order to secure his Junction with Count Bathiani, who continues his March on the Left in Five Columns; and proposes to reach the Marshal by the 23d. The Prince of Conti has erected two Bridges near Alschaffenbourg, notwithstanding there is a large Stone Bridge there. He has caus'd a Body of 12,000 French to pass the Main, to observe Count Bathiani; and there is now a greater Probability of a decisive Engagement than ever. This Moment we hear, that the Austrian Hussars have taken Possession of the Town of Konigsstein.

Hague, June 24. Major du Tour arriv'd here this Evening between Six and Seven, with Advice, that the Citadel of Tournay capitulated on the 19th at Midnight. The Garrison marched out with all the Honours of War, four Pieces of Cannon, and two Mortars. It was reduced from 9000 to 5300 Men. They are to be escorted to Courtray, and from thence to Ghent; and are not to serve against France before the 1st of January, 1747. The Baron de Dort, who remain'd in the Town of Tournay on account of his Indisposition, is so well recover'd, that he is expected here speedily. As soon as the French had taken Possession of the Barrier of the Citadel, his most Christian Majesty detach'd 20,000 Men to invest Namur. It is said, the French expect a Reinforcement of 26,000 Men; and that while the Count de Clermont carries on the Siege of Namur, the King and the Count de Saxe will cover it with their Army. Letters from the Rhine from good Hands bring Advice, that on the 18th Instant M. Traun's and M. Bathiani's Armies were but two Marches from one another; and that by the Prince of Conti's Dispositions then making, it seem'd as if he was meditating a Retreat as far as Worms. Lord Tyravley arriv'd here from Hanover on Wednesday last, and sets out for England To-morrow or next Day; as does M. Osorio for Hanover.

HOME PORTS.

Deal, June 17. Wind S. W. Last Night failed his Majesty's Sloop the Baltimore and Jamaica, with the Outward-bound Ships; but are since put back, and remain with the Duke Man of War, and Rawleigh Privateer. Came down the Swift, Bartholomew, for Maryland; the St. John Baptist, Harvey, and the Katherine, Perry, for Lisbon.

Graveland, June 17. Passed by the Ruby, from Maryland; the Providence, Marson, from Norway; and the Concordia, Stoerfon, from Gottenburgh.

SCHWANBERG'S LIQUID-SHELL

TO BE DEFENDED UPON IN THE

GRAVEL and STONE

THE Rev. Dr. HALES, and others, have demonstrated by various Experiments, That the Vir- tue of Mrs. Stevens's Medicine for the GRAVEL and STONE depend upon the SALTS of Lime in the Alicant Soap, calcin'd Shells; but its enormous Dose renders it so un- answer any good End. This, then, will inform such un- derstanded Persons who are afflicted with the GRAVEL and STONE, M. SCHWANBERG, a learned and ingenious Gentleman, versed in the most abstruse Operations of Chymistry, has a method of Liquifying calcin'd Shells, so as to become lim- pid, yet not corrosive. They give almost imme- diate Relief in the most violent Pains of the GRAVEL, and Urinary Passages, when too large to pass off otherwise. It may be depended on in the Wind-Colic, and all kinds of flatulences; and, where an Alient is wanting, will answer the end of a Child may take them in the Mouth, for Gripes, Fevers, and Uneasinesses, which Children are subject to, Acidity, the known Cause of most of their Disorders.

It is remarkable, That those who take them for STONE, have a Sediment in their Urine resembling good Chalk: Now, that this Sediment is a Portion of the Stone dissolved, is evident from an Experiment in the Power of one to make, for, put an human STONE, form'd in the Urinary Passages, into a Vial of the Liquid-SHELL, and it will gradually dissolve into a White Powder, exactly resembling the Urine of Persons who take it as a Medicine for the STONE, and this in an Heat not greater than that of the Body, yet the same time, not in the least affect an human Hair put in; and, which surprisingly will, upon the Addition of an Acid, be instantly converted into a Snow-white Powder.

To be had of the Proprietor W. Baker, at his House in Hel- court, near Katherine-Street in the Strand; and, by his Ap- pointment, of R. Lee, Stationer, under the Statuary's, facing jeants-Inn in Fleet-Street; and of John Newbery, at the Golden Ball in Castle-Alley, near the Royal Exchange, London; at his Printing-Office in Reading, at 1 s. 6 d. the small Vial.
